

Low Cost Hosting Plan

Massive bandwidth increase! See below for details. Forwarding is fine for small sites, but for a really professional look you can't beat true web hosting for your domain. Our low cost hosting account comes loaded with all the features that will help you get the very best from your website:

50-1000 MBytes of Webspace

Hosted on our fast UK based Unix Servers

Unlimited sub-domains

eg: subdomain.yourname.co.uk mapped to a subdirectory in your site

Microsoft Frontpage 2003™ server extensions

We support the UNIX version of the Frontpage server extensions (does not include ASP/SQLServer support)

Server Side Includes (SSI)

Simple embedded scripting functions

Full CGI-BIN

Run Perl and Python scripts

PHP4 & PHP5 support

Comprehensive scripting embedded in your pages. PHP5 is supported using fast cgi.

MySQL support

Create database driven websites using Perl or PHP scripts. Now available with all hosting accounts.

5GBytes+ of data transfer per month

The base amount of 5 GBytes per month is enough for most sites, our upgrade accounts have even more transfer allocation.

FTP Server

Available 24 hours a day, the ftp server allows you to upload files to your web space

SPAM Filtering

Spam Assassin based SPAM filtering

Unlimited email forwarding

Forward mail to other email addresses

10-100 POP3/IMAP mailboxes

As an alternative to forwarding, mailboxes allow you to read your mail directly from our servers

Webmail

Access your mailboxes via a web-browser from anywhere in the world

Unlimited auto-responders

Automatically reply to emails

SMTP server

Send mail using our SMTP server. Authenticate using POP before SMTP or SMTP-AUTH.

Web control panel

Allows you to change web/email settings and view server logs

Full online statistics

Online Analog/Webalizer access log report or download raw server access logs
